# Bowden & Ball Ringing Partnership Report – 2023

## Introduction

This is the 12th annual report that has been produced by the Bowden and Ball Ringing Partnership. This annual report is intended to give a brief indication of the activities and some of the results of the following 'members'. Most ringing is undertaken in Lincolnshire, though some of our regular owl box schemes are just over the border into neighbouring counties. In addition Steve Biglands moved to Northumberland when he retired, so his ringing is carried out up there. Daniel now lives and Works in Suffolk. Also Andrew Chick has temporarily moved up to Windermere, so his ringing activities were carried out in Cumbria in 2023.

It is sad to report that Niven Vessey, a former 'C' ringer in this group, died during 2023. He started ringing in 1986 (first two birds that he ringed were Twite followed by Lapland Bunting!) and stopped ringing due to health reasons at the end of 2020.

Name	Permit no		Name	Permit no
Alan Ball	A2544		Andrew Chick	C4074
Keith Bowden	A4168		Brian Leonard	C5598
Daniel Wade	A5842		Garry Steele	C5857
Bob Sheppard	C2932		Jack Dawson	C6640
Steve Biglands	C3948		Ian Willoughby	C7020

The number of birds processed by group members in 2023 is shown below. Note that this does not necessarily demonstrate ringing effort as, for instance, when Bob and Alan go ringing together, Alan normally does the ringing and Bob the scribing. The table also only includes birds ringed using the Partnership's rings, so again does not indicate individuals total effort during the year, such as Daniel who ringed birds in Sweden and at Kessinglang RG in Suffolk.

2023 Observer Ringing Totals				
Observer	Full grown	Pulli	Retraps	Total
Alan Ball (AB)	3486	407	380	4273
Keith Bowden (KB)	7	0	0	7
Bob Sheppard (RS)	7	33	17	57
Steve Biglands (SB)	198	0	28	226
Andrew Chick (AC)	132	80	2	214
Brian Leonard (BL)	83	114	25	222
Daniel Wade (DW)	3	0	1	4
Garry Steele (GS)	2	15	1	18
Jack Dawson (JD)	13	0	0	13
Ian Willoughby (IW)	51	71	2	124
Phil Neale (visiting ringer)	2	24	6	32
Others	5	1	8	14
<b>Total</b>	<b>3989</b>	<b>745</b>	<b>470</b>	<b>5204</b>

## 2023 Site Capture Totals

The following table contains those sites where over 50 birds were processed in 2023.

	2023 Site Totals	Adults Ringed	Pulli Ringed	Total Ringed	Retraps/ Controls	Total Birds	No of Species
1	Bourne Wood	1069	8	1077	137	1214	22
2	Marston STW	1079	0	1079	100	1179	38
3	Northorpe Fen	463	4	467	11	478	14
4	Dunsby Fen	368	0	368	30	398	16
5	Dunsby	197	0	197	40	237	17
6	Fenwick (Northumberland)	198	0	198	28	226	15
7	Alvingham	61	73	134	17	151	13
8	Anderby Creek	144	0	144	1	145	22
9	Thicholme (Cumbria)	130	0	130	2	132	6
10	Spring Wood (Cumbria)	2	80	82	0	82	3
11	Westfield Fm, Cranwell	57	0	57	1	58	9
12	Saul's Bank, Benington	8	40	48	8	56	7
	** Other sites (231 no.)	213	540	753	95	848	
	Total	3989	745	4734	470	5204	

Note \*\* High number of 'other' sites is due to isolated nest-boxes spread throughout Lincolnshire and adjacent counties, where just a few chicks and/or up to two adults are normally ringed.

*There was a considerable size difference between the smallest Peregrine chick and its siblings at Louth Church this year. Chicks in the photo are 18 and 20 days old. The experienced adults continued to brood the 'runt' at nights when the others were too big to brood and, surprisingly, it successfully fledged around ten days after the others. Unfortunately this chick was too small to ring on the date of the ringing visit.*

This Jack Snipe was found roosting at Marston in January. They rely on camouflage and sit very tight and normally only flush when there is the chance that they may get trodden on! They can be caught (if expertly spotted!) by using a landing net as was the case with this one.

Thanks to Tom Robinson who monitors the breeding Bitterns, another four Bittern chicks were ringed in 2023 making ten in total since 2020. Bittern chicks are difficult to ring as they are just big enough to ring about 24 hours before they leave the nest., so timing is crucial. We now ring more Bitterns than anyone else in the UK. Both nests had three chicks, with one chick in each nest just too small to ring at the time of the nest visit.

We also ringed 11 Little Egrets and four Grey Heron chicks at the colony at Dyson's Leadenhall Farm site. This colony has around 8 pairs of Grey Herons and 35 pairs of Little Egrets and only a few nests are accessible by using ladders.

## Nest Records 2023

Group members managed to contribute a total of 312 Nest Record Cards of sixteen species to the BTO Nest Record Scheme as shown in the table below. As usual, the majority were as a result of the owl nest box monitoring. Barn Owls and Kestrels were lower than usual due to a very poor year and not being able to check all of the nest box schemes.

Nest Records 2023							
Species	Nests	Average number of eggs	Average Number of chicks	Average Visits per nest	Outcome Percentages		
					Success	Failure	Unknown
<b>Raptors</b>							
Kestrel	63	3.6	2.4	1.4	16	13	71
Peregrine	5	4.2	3.2	5.8 *	80	0	20
Barn Owl	106	3.1	1.7	1.3	3	18	79
Little Owl	66	4.0	3.0	2.0	5	15	80
Tawny Owl	32	1.7	1.2	1.3	3	19	78

Great Tit	6	6.8	6.7	2.5	0	0	100
Jackdaw	9	4.7	2.0	2.0	0	11	89
Raven	2	4.5	4.5	2.5	50	0	50
House Sparrow	2	4.0	3.5	3.5	50	0	50
Tree Sparrow	2	4.0	4.0	2.0	0	0	100
<b>Other Species</b>	<b>40</b>						
<b>Grand Total</b>	<b>312</b>						

**Note\*** Number of nest visits is artificially high for Peregrine where most of the 'nest recording' information is gained from remote CCTV coverage – only one physical nest visit is made when they young are at an appropriate stage for ringing.

Skylark nest found (accidentally) when ringing Barn Owls at Digby in June and subsequent visits

## Review of the year 2023

Just 4,732 birds of 66 species were ringed in 2023, the second lowest annual total since the Partnership was formed; the lowest being 4,372 in 2021 when ringing activities were severely reduced by Covid 19 restrictions.

The highlights were an annual record for Pied Flycatcher with 14 ringed (1 adult and 13 nestlings) due to the fact that Andrew has temporarily moved up to the Lake District and installed some nest-boxes in a local wood. It was an equal best year for Bittern with four pulli ringed out of six at two nests in the south of the county. Bitterns in this area are increasing nicely and we now ring more Bitterns than anyone else in the UK. We also managed to colour-ring 11 Little Egrets at Dyson Farming's Leadenhall site and ringed two late broods of two Grey Herons at the same time.

We ringed two broods of four chicks of Ravens on the BT masts and eight is our second highest total, after 12 from three nests in 2021. We did quite well for colour-ringing Peregrine chicks with broods of four at Bottesford Church, three at Louth Church, three at a new site at Yaxley Church (Peterborough), and one at Temple Wood BT transmitter tower. Finally one was rescued from the ground after a 'failed first flight' below a pylon at Leasingham.

On the negative side, we ringed no gull species during the year and the only waders were a Jack Snipe at Marston in January and one Lapwing chick at Nocton in June.

There was no suitable weather (cold/damp) in spring to catch Swifts and hirundines at Marston Sewage Treatment Works and we ringed just one Sand Martin and 14 Swallows during the year with no Swifts or House Martins – it was over forty years ago (1981) since we ringed zero Swifts and zero House Martins in a year!

All in all it was a fairly depressing year, with just moderate numbers of finches and buntings early in the year, and a very poor breeding year for owls and Kestrels due to lack of food. The reedbed at Marston STW was kept dry by Anglian Water to facilitate maintenance work in autumn, and there was a distinct lack of Reed and Sedge Warblers in early autumn. Moving to the works end of the site and ringing in the willows did produce our second highest ever total of Chiffchaff (195 versus last years record total of 200) and good numbers of Blackcap.

Brian ringed 13 Starlings of the year total of 14 with Steve ringing the other. Steve also ringed the majority of the sparrows in his Northumberland garden with 55 of the 72 House Sparrows and 17 of the 28 Tree Sparrows.

It was not a particularly good year for Meadow Pipit and ringing around 120 near the Works at Marston was the result of much effort in September into October. It was nice to be rewarded with details of a subsequent recapture of one of our Meadow Pipits in Hertfordshire, eight days after ringing. At the end of the Meadow Pipit passage at Marston, a reasonable effort was made to catch migrating Lesser Redpoll with 80 ringed and the surprise there was the site's first Common (Mealy) Redpoll.

The only 'good' bird of the autumn during a few ringing sessions on the coast at Anderby Creek was a rather smart Firecrest.

Substantial tree clearance work of the Ash at the southern end of Bourne Wood has resulted in our feeding station there being very exposed. It would have been destroyed entirely had quick-thinking Bob not cordoned off a few bushes and scrub. However, a few ringing sessions there in November showed that the feeding station surprisingly was still productive. A record catch on 21<sup>st</sup> November comprised 149 new and 8 retrap Blue Tits and 55 new and 4 retrap Great Tits out of a catch of 213 new birds and 12 retraps...a real day for sore fingers!

## Recoveries received during 2023

The partnership received details of 88 bird recoveries of 24 species either ringed or recovered by group members during 2023. As usual, a good proportion of these (44) were Barn Owls which have a high reporting rate by members of the public.

Movements involving overseas included a Black-headed Gull to The Netherlands and another from Denmark, a Blackbird to Finland and a Chiffchaff to The Netherlands.

The full details follow, and include some retraps where the age of the bird is considered noteworthy.

## Ringling/Finding Details of Bird Movements in 2023

Ringling details are given on the first line and recovery data on the second or subsequent lines.

The first line entry is normally, ring number followed by an age code, date of ringling and place of ringling.

On the next line, or subsequent lines where reported more than once, there is a code for the manner of recovery (if known) followed by date and place of recovery.

The distance that the bird has moved (if any) is given in kilometres and the direction of movement is shown as sixteenth points of the compass (N, NNE, NE, ENE, E etc.). This is followed by the time elapsed between ringling and recovery in years and days.

The age code is given according to the 'Euring' code and do not represent the age in years, but are as follows:-

odd number = bird of known age

even number = exact age not known

1 = pullus, nestling or chick

2 = full grown, but exact age unknown

3 = Hatched during current year

4 = at least one year old

5 = hatched during last year

6 = at least two years old

Record Code

M = Male

F = Female

J = still in juvenile plumage

R/C = Retrapped or controlled ( Rb/Cb found breeding)

VV = Ring number read in field

S = Identified from sighting colour-marks (colour rings, wing-tags or neck collars)

X = Found dead (Xf = freshly dead, Xl = long dead, Xy = Dying)

Xr = Road Casualty,

Xo = overhead wires,

Xw = hit window,

Xd = drowned,

Xb = entered building,

Xp = taken by bird of prey

+ = Shot

? = unknown circumstances

A = Found alive (includes sick where fate unknown)

The initials of the group member is included for either the bird being ringed or found by a B&B Partnership member and the entry appears in normal type. *The entry or ringling information of controls and finding information if not made by us appears in italics*

## Little Egret

GY44800	1	29/05/23	IW	Leadenhall Farm, Holbeach Marsh, Lincolnshire	
<b>P U</b>	S	12/07/23		Kilnsea Clays, East Riding of Yorkshire	(80 km, N, 44 days)
	S	23/08/23		Kilnsea Clays, East Riding of Yorkshire	(80 km, N, 86 days)
	S	05/10/23		Kilnsea Clays, East Riding of Yorkshire	(80 km, N, 129 days)

GY62951	1	29/05/23	IW	Leadenhall Farm, Holbeach Marsh, Lincolnshire	
<b>P Z</b>	S	28/08/23		Tynningham Bay, Dunbar, East Lothian	(386 km, NNW, 91 days)

# Acknowledgements.

We would particularly like to thank the various site owners for permission to carry out general ringing activities on their land, including:-

Dyson Farming for their substantial nest box scheme across Lincolnshire, as well as passerine ringing sites on their wild bird cover crops and to the supply of wild bird seed.

Anglian Water staff including Mike Drew and Alan Bee for Marston Sewage treatment Works.

Hugh Dorrington at Aveland Trees, Dunsby and also for around the STW at Dunsby village. Ben and Heather Atkinson for the baited Stewardship site on Dunsby Fen and wild bird seed..

Forest Enterprise for Bourne, Twyford and Temple Woods for general ringing and their other woods for Bob's Tawny Owl nest-box schemes,

Matthew Davey and Lincolnshire County Council for the dunes at Anderby Creek.

Wade Nurseries and J.W.Grants for sites on Northorpe Fen

We would like to thank many people who are associated with the Barn Owl monitoring, particularly Colin and Val Shawyer, for their continued expert help and advice throughout the year. We would also like to thank the boards and personnel from the various Drainage Boards and Environment Agency for funding the erection and maintenance of barn owl boxes and allowing us access and assistance to monitor them. We would particularly like to thank a number of Drainage Board personnel who accompany either Alan or Bob around their boxes

The continued interest and assistance of David Moor (A M Borrill), John Sykes, John Lord, Paul Holmes, Jonathan Fowler, J. E. Piccavers, A .H. Worths, Peter Gilbert, Andrew Farrow, Steve Mitchell (Denton Estates) for arranging access to Barn Owl boxes that either they have erected themselves, or we have erected with them, is also gratefully acknowledged.

We would like to thank the Forest Enterprise ranger, Willie McLaughlin, for his time and effort put in to locate breeding Red Kites, Buzzards and Ravens and we are also deeply indebted to Steve Collins, our expert tree-climber, who then subsequently risks life and limb getting to their nests for us, although no tree nests were accessed in 2022 or 2023.

We thank all the staff and local people at St Wulfram's Church at Grantham, St Mary's Church at Bottesford, St Botolph's Church (The Stump) at Boston, St James' Church at Louth and, new for this year, St Peter's Church at Yaxley for our Peregrine nest-trays.

We thank British Telecom for our Peregrine nest-tray on the Temple Wood transmitter tower and providing their riggers for accessing the Peregrine tray and the Raven nests both there and at the Carlton Scroop transmitter Tower for us.

We also thank Nick Williams and to Tom Robinson at [www.Wildlife Hides.co.uk](http://www.Wildlife Hides.co.uk) for being able to ring some pulli at those locations where birds are not being photographed, such as Long-eared Owl and Bitterns this year though Tom's artificial Kingfisher nest site was not used this year.

We thank the Environment Agency for their pole-box schemes on the River Ancholme, South Forty-Foot, East and West River Glen, Brant and Upper Witham, the Louth Canal and Donna Nook Re-alignment scheme and to the following drainage boards:-

Black Sluice IDB;	Lindsey Marsh DB;	North Level IDB;	South Holland IDB;
Upper Witham IDB;	Witham First IDB;	Witham Third IDB;	Witham Fourth IDB;
Welland & Deepings IDB;	North East Lindsey IDB.	Isle of Axholme IDB;	Trent Valley IDB
Ely IDB			

We would particularly like to thank a number of Drainage Board personnel who accompanied either Alan or Bob around their boxes including Gary Hunt, Mick Henfrey, Paul Sharman, Dean Holland, Nick Downing, Simon Carter, Simon Horton, Adrian Skelton, Tim Smith, Richard Fisher, Darren Scott and various EA personnel.

Thanks are also due to the many other landowners and other individuals, too numerous to mention individually, involved with Kestrel, Barn Owl and Little Owl nest-boxes.
